

TOYO Packaging

Toyo Packaging was established in 1989 and has emerged among the leading flexible packaging companies in Pakistan. It deals in conversion of flexible packaging material and specializes in gravure printing, bag making, anti-counterfeiting holographic film, PVC Twist film, PVC Rigid Sheet and triplex laminates.

Toyo Packaging serves clients from diverse backgrounds and industries including multinational FMCG's, tea, confectionary, cakes, snacks, ice creams, textiles, pharmaceuticals and automotive. With twenty-five years of experience in the industry, they not only serve well-established companies but also support new setups and assist them with know-how of the packaging field.

Toyo Packaging produces a wide range of custom designed laminate structures for the primary packaging of products in solid, powder or liquid form in consumer packaging as well as bulk packaging. ♦

PFM Packaging

Founded in 1991, PFM North America is engaged in manufacture, distribution and support of PFM products to the North American markets from its state-of-the-art facilities in Ontario, Canada. With a production staff of 35, the company builds a variety of equipment including flow-wrappers, automatic packaging and processing lines and feeder systems for both food and non-food products.

The PFM Group produces a complete range of horizontal flow pack machines, vertical form fill and seal, multi head weighers and automatic packaging lines to meet any need of flexible packaging for food and non-food applications.
