

Natec's world class processed cheese solutions

Hochland Natec GmbH, Gold Peg International Pty Ltd and Natec USA LLC have joined forces to form an international network of companies – the Natec Network. These well-known market players draw on many years of experience in high-quality machinery and plant engineering for the industrial food production sector. The innovative spirit, as well as the willingness to tailor the technology completely according to the customer's needs and business goals, make the network a partner who provide more than just technical infrastructure. The innovative and customized machinery and plants are key factors in contributing to the value and development of the customers in the food production industry.

Natec Network are proud to present their success generating food technology. No matter what stage of the business life

cycle, from start up to multinational, they are able to support you in creating value for your business. The unique range of processing and filling equipment from a few hundred kgh to 10,000 kgh means they have solutions and systems to support evolve with you and your business. The extensive knowledge and background on product formulations, yield maximization strategies and process optimization provides the perfect accompaniment to our equipment portfolio.

Specializing in processed cheese and pasta filata the flexibility of our solutions provide an extensive range of products and formulations that can be manufactured using the same equipment. From a processing perspective we provide unique mixing and blending solutions, batch or continuous, pasteurize and UHT variants.

For end-product formats and filling we provide various slice formats, sticks, cubes and shreds and inconjunction with a strong partner relationship we also provide blocks and portions. ♦
