

## MPAC Langen

Mpac Group plc is an international company, listed on the London Stock Exchange (symbol: MPAC), with a long and proud history of delivering innovation and excellence on a global basis.

The Group operates as a single business with regionally focused sales and service organisations. The company as a whole employs circa 350 people worldwide. The business is focused on supplying innovative high speed packaging solutions and related support services and systems, principally to the pharmaceutical, healthcare and food & beverage sectors.

## Bakers Perkins

In the bakery, biscuit, confectionery, snack and breakfast cereal sectors, many of the world's leading brands rely on technology supplied by Baker Perkins. This independent company operates from two sites in the UK and the USA.

The company's strength lies in its process expertise, engineering excellence and the ability to fully support customers worldwide. The service is complete - from design through installation and commissioning to lifetime support.

Unit machines and production systems are based on over 100 years' experience in the special techniques and requirements of the chosen industries. Baker Perkins' market leading position throughout the world is maintained by constant development of equipment and processes to provide customers with profitable new opportunities. A range of services has also been developed to exploit the latest technology to maximize efficiency, and minimize cost of ownership of new and existing plant and processes.

## MULTIVAC: More than 50 years of packaging competence

MULTIVAC is one of the leading providers worldwide of packaging solutions for food products of all types, life science and healthcare products as well as industrial items.

At Gulfood Manufacturing 2018 MULTIVAC showcased packaging solutions that enabling process and pack more efficiently and sustainably. A wide product range was on display from Vacuum Chamber machines, Traysealer and Thermoforming machines to a Slicer, a Vacuum Filler, and a wide spectrum of packaging materials and consumables.

Their portfolio covers nearly all customer requirements with regard to pack design, output and resource efficiency, and includes vacuum chamber machines, traysealers, thermoforming packaging machines, labellers, quality control systems, automation solutions and even turnkey lines. Our customers benefit from our profound knowledge of processes and systems, as well as from an integrated advisory service all from one source. ♦
