Hayssen Flexible Systems offers vertical and horizontal form/fill/seal packaging, horizontal flow wrapping machinery. ♦

ZULTEC offers innovative solutions for diversified industry segments

At IFTECH 2019 their focused area is AI Machine Vision which is transforming food and beverage industry by solving complex industry issues for quality control and regulatory compliance. In partnership with Cognex, they have enabled hundreds of plants with vision and barcode reading technologies to improve their bottom line by eliminating production defects and enabling automation. Measuring production volumes on high speed lines, inspecting logo and print, checking for damage, inspecting patterns and ensuring products end up in correct packaging is crucial for any business success.

Some of the other show highlights included:

Industrial Weighing Solutions: They cover all touch points of Industrial Weighing. From floor scales for your raw materials receiving, scales for your food formulation and dosing to Multihead weighing at your filling stations & weigh price labeling for your final product, we

provide integrated precise weighing solutions for every step of your production.

Packaging Solutions: The most reliable range of packaging solutions for your needs at Zultec. We provide thermoforming, traysealing, Stretch Wrapping, VFFS and Shrink Wrapping solutions.

Processing Lines: The complete processing lines for Meat, Dates and Ready Meal.

Industrial IT: Zultec provides a range of business mobility solutions essentials for those looking to automate their production plants and improve their staff and production efficiency. From Mobile Computers to Barcode Printers and Scanners, Time and Attendance Systems

and software applications for warehouse and inventory management, they cover all area of business mobility.

Product Inspection Solutions: Zultec carries the broadest range of product inspection systems including X-Ray, Metal Detectors, Check-Weighers & Machine Vision systems.

Product Coding & Marking: The best in class continuous inkjet printers, thermal inkjet, thermal transfer overprinters and laser coders.

Packaging Materials: With one of the largest PET / PP food containers manufacturing factory and Labels converting facility, we are geared to help you add aesthetics and shelf life to your food packaging. ♦
